

OUR HISTORY:

RAD-AID began in 2008 to answer the need for radiology in poor regions of the developing world. RAD-AID has grown to become affiliated with the United Nations and World Health Organization, with over **14,000** volunteers, **85** university-based chapters, serving in **83** hospitals in **38** countries.

WHERE WE WORK:

AFRICA

Botswana
Cameroon
Cape Verde
Ethiopia
Ghana
Kenya
Liberia
Malawi
Morocco
Nigeria
Rwanda
South Africa
Tanzania

ASIA/EUROPE

Albania
Bangladesh
Bhutan
India
Indonesia
Jordan
Kazakhstan
Laos
Nepal
South Pacific/
New Zealand
Ukraine
Vietnam

AMERICA & CARIBBEAN

Canada
Grenada
Guatemala
Guyana
Haiti
Jamaica
Nicaragua
Peru
USA

RAD-AID earned a perfect score (100/100) from Charity Navigator and has Official Relations status with WHO.

Recent RAD-AID Accomplishments:

- Serving the world for 13 years, founded in 2008.
- Launched cloud, AI, and IT infrastructure and training in over 15 countries.
- Received United Nations Award in 2019 for training radiology and health workers to fight noncommunicable diseases.
- Contributed over \$20 million and 100,000 volunteer hours to medically underserved areas..
- Assisting radiology at 83 low-resource hospitals to impact 189 million patients per year.

Radiology serving the world

HALF THE WORLD HAS NO RADIOLOGY

Radiology is the vital link in health care, providing the crucial medical images in pediatrics, obstetrics, surgery, medicine, & screening programs. WHO reports that 4 billion people in the world are at-risk for losses and deaths that could be avoided if radiology were available.

RAD-AID brings radiology & medical imaging to poor communities of developing countries. You can make the difference...

Over 14000
volunteers
and
supporters
from over
140
countries.

International Teaching & Consults

GET INVOLVED:

Join our 13th annual RAD-AID Conference, Saturday November 5, 2021 virtual and/or live, in Washington DC.

Form a RAD-AID Chapter

RAD-AID Conference on global projects

HOW WE WORK:

RAD-AID uses a straightforward method for implementing projects. Our first step is Radiology-Readiness, which is RAD-AID's trademarked data collection and analysis tool so that we can optimize every radiology project for the specific needs, infrastructure constraints, and health care system attributes of a region or facility.

Second, we plan the outreach project based on the Radiology-Readiness assessment. Third, we use the plan to implement the project, such as installing hardware, training personnel, designing technology, assisting medical case conferences, and helping our partners.

Fourth, we emphasize education. RAD-AID trains in-country partners to use and maintain the implemented program. More importantly, we receive training and education from our in-country partners so that our teams learn about clinical and cultural factors influencing the success of our collaborative program.

Finally, we analyze the results of our project to grow and improve our objectives and strategies. Then we return to our first step again, repeating Radiology-Readiness, to address more challenges and fill more gaps in global health. This cycle of data collection, planning, action, reflection, and renewal, keeps RAD-AID moving forward.

WHAT WE DO:

Clinical Radiology Support

RAD-AID forms interdisciplinary teams of physicians, technologists, nurses, public health officials, and other professionals to help hospitals in developing countries implement and use radiology for saving lives. Volunteers and health workers from over 140 countries visit our web site to form partnerships. Our teams visit hospitals around the globe to teach, innovate, help patients, and collaborate.
